(+91) 7386817536 | anushavirri@gmail.com | <https://www.linkedin.com/in/anushavirri/> | <https://github.com/vi-anusha>

SUMMARY

Data Scientist with 2+ years of experience designing scalable ML, statistical, and NLP solutions for marketing and audience analytics. Skilled in Python, SQL, PySpark, and AWS (SageMaker, Bedrock) for building cloud-native systems. Experienced in optimizing data pipelines, enhancing model accuracy, and driving data-informed decisions.

SKILLS

Programming Languages: Python, SQL, PySpark, R, Scala, Java, C

Databases: AWS Athena, MySQL, Spark SQL, FAISS, Pinecone

Frameworks and Libraries: scikit-learn, TensorFlow, Keras, PyTorch, spaCy, NLTK, pandas, NumPy, seaborn, matplotlib

Cloud and AWS Services: S3, Athena, Lambda, Bedrock, SageMaker, AutoML

Tools and Software: Tableau, Power BI, Snowflake, Git, GitHub, Jupyter, VS Code, Excel, Linux, Hadoop, PuTTY, Linux CLI tools, Jira

WORK EXPERIENCE

Data Scientist, Comscore, Pune, India

July 2025 – Present

- Performed large-scale **statistical analysis** on cloud-scale telemetry and audience datasets using **AWS Athena and Spark**, improving demographic signal coverage by 70% and enabling more accurate customer segmentation.
- Developed **Competing Hazards predictive models** to quantify customer overlap and exclusivity across digital categories, achieving 90%+ accuracy and supporting **data-driven optimization** of migration and engagement strategies.
- Built and optimized audience classification models using **AWS SageMaker AutoML**, improving prediction accuracy and demonstrating scalable ML deployment on cloud-based architectures.
- Collaborated with cross-functional teams to design and implement **Bayesian personification models**, improving demographic distribution accuracy in program-level digital data.

Associate Data Scientist, Comscore, Pune, India

Aug 2023 – July 2025

- Developed 6 predictive segmentation models with **Python (scikit-learn)** on large-scale behavioral data, achieving **80%+ accuracy** and enabling more precise, data-informed business decisions.
- Enhanced **PySpark-based ETL pipelines** to support near real-time data ingestion and transformation, reducing latency from 21 to 6 days (71%) and ensuring consistency across analytical reporting systems.
- Developed deduplication algorithms using **Gaussian copula models** on **1M+** digital campaign records, achieving 90%+ accuracy and integrating into scalable telemetry-driven data pipelines.

Data Analyst Intern, Comscore, Pune, India

Jan 2023 – May 2023

- Improved metadata match rates from 20% to 50% by applying **NLP** techniques and regex for audience reporting.
- Optimized preprocessing workflows with **TF-IDF** vectorization and **KNN** algorithms, improving processing efficiency by 30%.
- Created automated **Power BI dashboards** to track processing efficiency metrics, accelerating stakeholder decision-making cycles.

PROJECTS

Video Anomaly Detection Using Deep Learning

Aug 2021 – May 2023

- Trained CNN and LSTM architectures in TensorFlow and Keras on 15K+ video frames across 30K epochs, achieving 95% accuracy and enabling real-time video anomaly detection.

Closed-Domain Question Answering System Using NLP

Jan 2021 – May 2022

- Developed a multilingual COVID-19 QA system leveraging POS tagging, Named Entity Recognition (NER), and TF-IDF with Cosine Similarity, achieving 90% entity extraction accuracy and improving answer relevance by 85%+ for Indic languages.

EXTRACURRICULARS

Hackathon: AI Bug Resolution Assistant with Amazon Bedrock

- Built a Retrieval-Augmented Generation (RAG) assistant using AWS Bedrock LLMs (Claude, Titan) and FAISS for vector search, achieving 85% resolution accuracy and automating deployment with MLOps practices for scalability.

ACHIEVEMENTS

- Earned 3 *Esprit de Corps* awards for leading legacy bug fixes, building cross-team overlap models, and delivering key business reports on tight schedules.

EDUCATION

Indian Institute of Information Technology, SriCity, India

Jun 2019 – May 2023

Bachelor of Technology, Computer Science and Engineering

GPA: 3.65/4.00
